

Symposium of Strategic Research on Global Mitigation and Local Adaptation to Climate Change

ABOUT

The goal of this symposium is to discuss the strategic research on global mitigation and local adaptation to climate change. The research topics concerning: (1) Mitigation strategy and future planning; (2) Urban climate and sustainability; (3) Urban energy system; (4) Urban hydrology and sustainability; and (5) Human health and adaptation strategy, are presented and discussed among the domestic researchers, governments, and private companies to design the future directions of the urban sustainable development. This symposium is also expected to be a forum for sharing knowledge between researchers, government and the private sector, especially from Indonesia and Japan.

This symposium was organized by Department of Meteorology ITB, Climate Change Center ITB, and Tokyo Institute of Technology on behalf of S14 Project.
